

11. The cellular radio of Claim 6, wherein said third processor performs signal processing on vectors.

B2 12. The cellular radio of Claim 11, wherein said third processor is a dedicated processor of the array processor type.

13. The cellular radio of Claim 6, wherein said first, second and third processors operate in parallel.

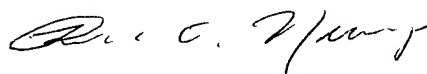

REMARKS

The disclosure is objected to because of the following informalities: the information of the parent application and the copending application should be disclosed. By this amendment, Applicants have amended the disclosure to identify the information of the parent application and the copending application, as requested by the Examiner. The objection to the specification is overcome.

New Claims 6-13 are renumbered Claims 26-33 which were the subject of an Election Requirement in Application 08/890,894, dated March 26, 1999, which Applicants chose not to elect on 04/26/99.

Applicants respectfully request that Claims 6-13 be examined at the earliest possible date.

Respectfully submitted,

Ronald O. Neerings
Reg. No. 34,227
Attorney for Applicants
